

† NOTE

Jibs with a hook reach of 150 ft (45.7m) and longer require the 75'-3" (22.9m) counterjib. For jibs with a hook reach of 132 ft (40.2m) or shorter, the 62'-2" (18.9m) counterjib must be used.

Consult Morrow Equipment for specific information regarding alternate tower configurations, alternate foundation details, dimensions, reaction forces and slab openings.
